Work Experience

Software Engineer, Co-Founder

Bien Miches | September 2023 - Present

- In September 2023 I founded a growing michelada mix e-commerce brand. We are now at 4 Distributors.
- Our online store leverages Shopify's headless e-commerce framework, Hydrogen, and global edge distribution, Oxygen, as well as remix.run, React, and Typescript. github.com/malexanderlvz/bien-miches

Director of Professional Services

FreeAgent CRM | June 2022 - August 2023

- Improved integration efficiency by 40%, optimizing project planning and estimation.
- Led a team in executing technical projects, utilizing tools like React, SQL, AWS, and others.

Co-Founder

Learkn | April 2020 - July 2021

- Spearheaded the concept and execution of the product vision, efficiently managing backlog and achieving an MVP launch within a three-month timeframe (Jul '20 - Oct '20), establishing a three-way marketplace MVP.
- Developed a robust 'YouTube/Udemy'-style platform, attracting 5.8k users

Software QA Lead, Business Implementation

Driscoll's | June 2019 - December 2020

- Key role in enhancing business processes; contributing to overall operational efficiency.
- Collaborated closely with developers to streamline external API integration and mapping.

LAMP Stack Web Developer

Contractor Advertising | March 2015 - July 2017

- Collaborative development of WordPress websites for law and contractor clients, leveraging a seven-member team to ensure nationwide success.
- Innovated internal software solutions, automating tasks with PHP, Bash, and Selenium, significantly boosting operational efficiency, while crafting and refining mobile-first, responsive themes using HTML, CSS, SASS, JavaScript, Gulp, Bootstrap, and WordPress for optimal user experiences.
